WELFORD & SONS, LIMITED, COWKEEPERS AND DAIRY FARMERS.

The *Times* says: "The dairies of Messrs. Welford are constructed with all modern hygienic improvements, and are under the constant inspection of a sanitary engineer, while the employees are under medical supervision. The drainage of all the buildings is arranged to obviate all risk of the milk becoming contaminated—in short, nothing has been left undone that science could devise to render the dairies perfect in every respect."
